UV BOX E3/40H NX-R
The UV-BOX series includes two different models of cabinets, with shelves (UV-BOX-R) or with the specific tool rack (UV-BOX-C). UV-BOX has a stainless steel structure and a door with a special LEXAN and anti-UV window, which allows to check the inside of the cabinet and its operation at any time. UV-BOX is equipped with automatic shut-off system of lamps, in case of opening of the door. The management of the turning on is carried out via the top panel, which allows to set the automatic timed switch-on, by means of the switch and the timer. The lamps are lit every time the door is closed and the treatment continues for the operation time set; between a disinfection cycle and the other one, it is possible to set the “pause” time, depending on needs, after which the lamps will turn back on automatically for a new cycle. UV-BOX is entirely manufactured in Italy, with high quality and extremely resistant materials.

Product Specification

Lisainfo

Manufacturer	LIGHT PROGRESS
Consumption (W) for all products on site	40W+40W+40W
Protection Rating	IP20
Hind	2 480,00 €
Country of Manufacture	Itaalia
